

Assess and Manage your CO₂ Emissions

- Calculate your CO₂ Footprint.
- Review your current CO₂ performance.
- Develop a CO₂ management strategy.
- Identify your CO₂ emission reduction potential.
- Communicate and capitalize on your lower CO₂ Footprint.

Our CO₂ Footprinting Services:

- Comprehensive CO₂ Footprint for companies, products and events.
- Report describing methodological approach and standards as well as presenting results and a benchmarking analysis. Compatible with GRI 3.
- Consultancy in Reducing your CO₂ Footprint, cutting back your energy, fertilizer, etc expenses.
- Preparation for certification of CO₂ Footprints through an independent and accredited third party.
- Assistance in communicating your CO₂ performance based on calculated emissions, reduced emissions, and/or neutralized emissions.

Why to work with us

- Compliance with internationally recognized standards (such as PAS2050, ISO, GHG Protocol).
- Definition of an adequate approach regarding allocation, system boundaries based on the customer's and market requirements.
- Scalability and cost competitiveness/effectiveness through Integration of CO₂ footprinting into existing management and auditing tools.
- Preparation and assistance for independent third party certification.
- Experience in assessing complex multi ingredient supply chains/product lines as well as advisory on system certification.
- Integration of the CO₂ footprint into broader assessment, management and communication schemes.
